OBJECTIVE

Goal-oriented Full Stack Developer with 3+ years of experience building scalable web apps, CRMs, automation systems, and cross-platform applications. Strong expertise in React, Node.js, Next.js, MySQL, MongoDB, automation workflows, API integrations, and performance optimization. Seeking opportunities to apply my technical and problem-solving skills to develop impactful, scalable solutions.

EXPERIENCE

Full Stack Developer

Nov 2024 – Present

Transformium India Pvt. Ltd.

Contract

- Developed a complete **Sales and Manufacturing CRM** to manage inquiries, sales pipeline, products, manufacturing processes, and dispatch operations.
- Built **dynamic product attribute system**, role-based access control (RBAC), and multi-level hierarchy for departments.
- Automated order syncing from **Amazon, FirstCry, and Shopify** using APIs, reducing manual workload and operational errors.
- Optimized courier assignment, delivery workflow, and tracking to reduce logistics cost and improve turnaround time.
- Integrated **WhatsApp API** for notifications and **Mailgun** for marketing and transactional emails.
- Developed a **cross-platform internal operations app** using Cordova (Ionic), deployable as Web, Android, and iOS from single codebase.
- Managed deployments on **AWS, configured EC2 for hosting, and used S3** for secure file storage and media management.
- Implemented modules for **PDF generation, Excel export, and Excel import** for bulk onboarding of old data.

Full Stack Developer

June 2024 – November 2024

Applie Infosol

6 months -Fulltime

- Worked on a project with three dynamic modules, built using **TypeScript** across the stack for type safety and consistency.
- Developed the **backend** using **Nest.js**, integrated **MySQL** with **TypeORM**, and documented APIs using **Swagger UI**. Implemented mailing services with **Mailgun**.
- Implemented a dynamic **multilanguage feature** allowing content to be updated without rebuilding the codebase, improving localization flexibility.
- Built the **admin panel** using **Metronic theme** and **Redux**, allowing dynamic handling of frontend language changes.
- Developed the **frontend module** in **Next.js**, integrated with **Calendly** for scheduling, and implemented custom search and filtering functionalities.
- Solved PDF generation issues using **Puppeteer** to dynamically generate high-quality PDFs, improving content delivery.

MERN Stack Developer

December 2022 – May 2024

Syndell Technology

1.5 Years - Fulltime

- Developed and optimized **websites/web apps** using the MERN Stack, resulting in improved performance and user experience.
- Designed efficient database structures for **seamless data management** and scalability, reducing query execution time.
- Implemented **secure and reusable components** for enhanced performance and scalability, reducing development time.
- Integrated **third-party services and APIs** to enhance application functionalities and user experience, resulting in a increase in user engagement.
- Transferred projects seamlessly from MySQL to MongoDB databases, ensuring **data integrity** and efficiency, reducing database query response time.
- Collaborated with cross-functional teams to plan and execute project milestones, ensuring **timely delivery** and customer satisfaction.
- Utilized **MVC structure** for organized and maintainable codebase, leading to improved code readability and maintainability.
- Deployed projects on **cPanel** for efficient hosting and management.
- Automated tasks using **RPA tools** like Power Automate, streamlining processes and improving productivity.

Frontend Developer Intern

April 2022 – Sept. 2022

Agile Academy

6 Months - Internship

- Designed and developed responsive web pages, banners, and logos using **Photoshop** and **Illustrator**.
- Gained practical experience in **UI/UX design** using **Adobe XD** and **Figma**.
- Utilized frontend development technologies like **HTML, CSS, JavaScript**, and **jQuery** to build interactive web pages.
- Collaborated with senior developers and designers to refine design concepts and improve user experiences.
- Learned how to apply design principles to create visually appealing and user-friendly web applications.

PROJECTS

Sales and Inventory Control Panel || *React, Node.js, MySQL, MSSQL, MongoDB, Express*

- Developed a web portal for a leading UK bed manufacturing company to manage products, customers, and orders.
- Integrated with Sage200 through API for product pricing management and order flow.
- Implemented admin panel features including inventory management and customer/product creation.
- Created a product generator to streamline product creation process and manage different product configurations.
- Manage CI/CD pipeline using GitHub, Jenkins, and Portainer for deployment.
- Enhanced product generator in phase two to manage pricing dynamically and import pricing data through Excel.
- Transferred database from MySQL to MongoDB for improved scalability.

Surgery Appointment Scheduler || *React, Node.js, MongoDB, Express*

- Developed a surgery appointment scheduler allowing patients to schedule surgeries.
- Integrated with Outlook calendar to display appointments in corresponding doctors' calendars.
- Managed patient records and hosted on cPanel for accessibility.

Talent Hiring Platform || *Nest.js, MySQL, TypeORM, Next.js, Puppeteer, Calendly*

- Developed a scalable API using **Nest.js** and **TypeORM** with dynamic multilanguage features, improving localization management.
- Built the **frontend** in **Next.js**, enabling scheduling and filtering features for users, with **Calendly** integration for meetings.
- Utilized **Puppeteer** for dynamic PDF generation, solving high-quality rendering issues and automating content delivery.
- Implemented mailing services using **Mailgun**, streamlining communication with users.

TECHNICAL SKILLS

Front End: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, Bootstrap, Tailwind, SCSS

Back End: Node.js, Express.js, Nest.js

Databases: MongoDB, MySQL, PostgreSQL

ORM: mongoose, sequelize, TypeORM, Prisma

Tools/Technologies: VS Code, Web Storm, Postman, Git, Power Automate, Adobe Xd, Figma

Devops: CI/CD, PM2, AWS, S3, Cloudflare, cPanel

Other: Sage, Stripe, MUI, CoreUI, Mantine UI, shadcn, Calendly, Mailgun, RPA, Whatsapp Business (Meta API), Amazon Seller

EDUCATION

Bachelor of Technology in Computer Science And Engineering

INDUS University

2019 – 2023

CGPA - 8.67

CERTIFICATIONS

Practical Web Development

Udemy

May. 2021 – June 2021

- in this Udemy course i learned **Frontend Technology** like **HTML, CSS, Bootstrap, JavaScript and JSON**.
- and **Backend Technology** like **PHP and SQL**.

HTML and Javascript

Society for Information Technology Devleopment (SITD)

April 2017 – May 2017

- Get basic understanding of **Webtechnology** like **HTML and Javascript**.

C and C++

Society for Information Technology Devleopment (SITD)

April 2017 – May 2017

- Get basic understanding of **Programming Languages** like **C and C++**.
